***Allowance of Application # 10/506,708***

1. The following communication is in response to applicant's amendment received 28-November-2006. Claims 1-17 are pending in the application.

***Reasons for Allowance***

2. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter.

2.1 The instant application is directed to a non-obvious improvement over the information described in the article authored by Baluch, entitled *Optimization of Transition Length Increase*, which discloses the possibilities of decreasing relevant track offsets by optimizing a lesser curve shift achieved by shifting [or offsetting] the tangent, while increasing the length of transitions and preserving straight cant gradients.

2.2 The improvement of the present invention comprises a method of shaping transition curves and superelevating railroad tracks and other vehicle guideways in accordance with a roll function comprised of parameters described by mentioned, or unmentioned, coefficients. This patentable distinction is included in independent claim, no. 1.

2.3 The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <method of shaping transition curves and superelevating railroad tracks and other vehicle guideways> having the corresponding structure

In re Application of: Klauder

which is disclosed in the specification and equivalents thereof at least at page 7, line 2 through page 12, line 6, and Figures 1-5. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.

***Response Guidelines***

3. Any comments considered necessary by applicant **MUST** be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should clearly be labeled "Comments on Statement of Reasons for Allowance".
